

Welded Wire Mesh

Safety First

Machine guards are a critical first line of defense, assuring safe working conditions around hazardous machinery or protecting delicate instrumentation from jarring and debris. Machine guards fabricated from Shepherd Welded Wire may be used to supplement existing guards, replace damaged screens or provide an entirely new cage around custom machinery.

- Bright yellow vinyl fuse-bonded coating is highly visible for maximum safety.
- 16 gauge welded 1/2" x 1/2" mesh provides a strong, effective barrier.
- Welded wire mesh may be cut or bent to fit virtually any application.
- Easy to handle; speeds fabrication and installation time.
- Resistant to most chemicals.
- Cut in 1 ft., 2 ft. and 3 ft. squares. Packaged in your choice of 3 panels packs or 5 panels packs.

Welded Wire Mesh

Quality Products Begin with Quality Materials

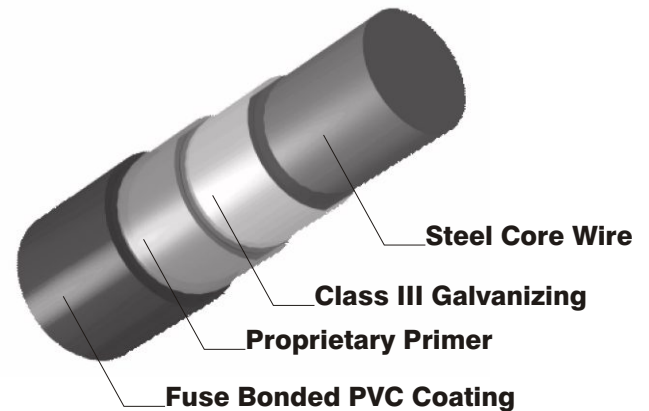

The best fence available begins with the most corrosion resistant wire available. Whether its immersed in water, buried in alkaline soil, sprayed with fertilizers or nicked with cutters, Shepherd Welded Wire Mesh withstands the rigors of a multitude of real world applications.

Conventional PVC coated mesh is covered with a sleeve of PVC. If the sleeve is cut or nicked, the entire length of the PVC sleeve peels away leaving the galvanized wire beneath exposed and unprotected. Shepherd's proprietary process of fuse-bonding powdered PVC yields a coating that is an integral part of the structure of the wire so it stays in place - assuring the best corrosion protection possible.

Founded in 1957, the C. E. Shepherd Company has a long history of innovation and quality manufacturing. Our product lines range from welded wire mesh for marine, aquaculture,

animal containment, greenhouse, erosion control industrial and fencing applications to plastic hinges and from vacuum formed, injection molded and extruded plastic components to embossed films for mold release applications and FRP manufacturing. Our nearly fifty years of success are a testament to our commitment to high quality products and customer service. Call on C. E. Shepherd Company's experienced sales staff to discover why we consider Shepherd Welded Wire the best available.
